

FOR ALL SEWING MACHINES — INCLUDING HEAVY AND LONG ARM SEWING MACHINES

TAPE FEEDER WITH SCISSORS

Tape feeds with pneumatic cutters for tapes from above in front of the needle

SPECIAL FEATURES:

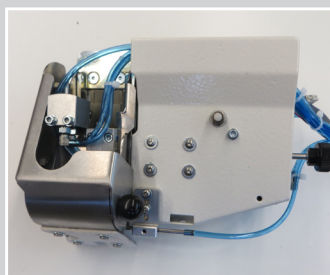

- Processing of thin Teflon tapes for hot air tape sealing machines
Tape guides are continuously adjustable from 18-26 mm
- Processing of thin tapes up to 1 mm thick for chain stitch and blind stitch machines
- Also designed for thick tapes up to 2 mm thick and 75 mm wide
- The guides can be pivoted downwards, thus ensuring free access to the sewing machine needle

FEEDER IN THREE VERSIONS:

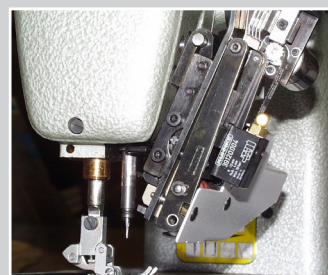

- Pneumatic feed via cylinder
- Electric feed with direct current motor
- Step motor feed, metering device

Tape feed with cutter on a lock-stitch machine

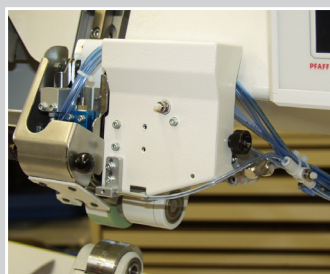

Tape feed with cutter for a hot air sealing machine

Tape feed with cutter on a lock-stitch machine

Tape feed with cutter on a hot air sealing machine

Tape feed with cutter for a hot air sealing machine

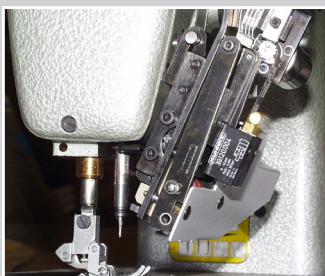

Tape feed with cutter and length metering device for a hot wedge sealing machine

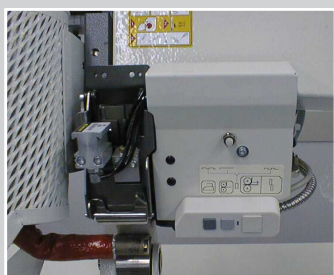

TAPE FEED WITH CUTTER FROM ABOVE IN FRONT OF NEEDLE

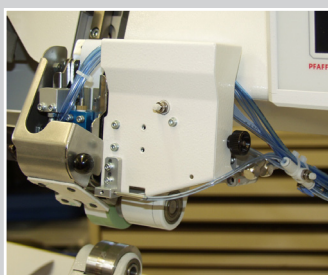

Small tape cutter on a single needle machine. With length metering device for sewing spacing stripes on blankets

Tape feed with cutter on a lock-stitch machine

Tape feed with cutter for a hot air sealing machine

Tape feed with cutter for a hot air sealing machine with cool roller for high sealing temperatures

Tape feed with cutter and length metering device for a hot wedge sealing machine
