

MANUAL SWING-UP ROBUST MULTI-POSITION EDGE STOPS FOR LEATHER AND OTHER MATERIALS

## MULTI-POSITION SWING-UP FABRIC EDGE STOPS

Please indicate the desired seam distances when ordering

A multi-position fabric edge stop has two cylinders. These enable the retrieval of four distances: Home position (narrowest distance)

Cylinder 1

Cylinder 2

Cylinder 1 + 2

### SPECIAL FEATURES:

- Speedy conversion to other edge distances without mechanical distances.
- All edge stops are available with fixed straight stops or stop rollers / stop rollers
- All desired seam distances are available

### MK DIFFERENTIATES BETWEEN PNEUMATICALLY ADJUSTABLE AND STEPPER MOTOR CONTROLLED FABRIC EDGE STOPS

Pneumatically controlled fabric edge stops can move to up to four different seam distances. Actuation occurs via pneumatic toggle switches, an electric rotary switch or stepper motor control.
