

FABRIC EDGE STOPS FOR ALL SEWING MACHINES

FABRIC EDGE STOPS

The fabric edge stop ensures a uniform distance between the fabric edge and the needle penetration.

WE DIFFERENTIATE BETWEEN THE FOLLOWING:

- Edge stops on the sewing machine base plate
- Swing-up edge stops fabric edge stops swiveling up

STOPS

SPECIAL FEATURES:

- A modular system. Several edge stops can be positioned adjacent to each other and swiveled up or down independently.
- Fitting is possible to the right and left of the needle.

PNEUMATIC FABRIC EDGE STOPS

SPECIAL FEATURES:

- Edge stops with pneumatic ventilation, swing-up action
- Edge stops with pneumatic right/left switching
- Edge stops with pneumatic switching for up to four edge distances
- Edge stops for fitting to the machine base plate

FABRIC EDGE STOPS FOR LEATHER AND MEDIUM-SIZED SEWING MACHINES

SPECIAL FEATURES:

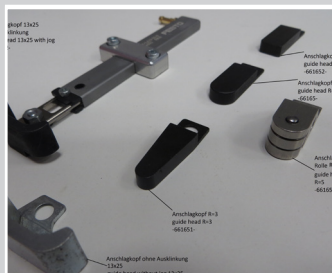

- Robust fabric edge stops for all sewing machine makes
- Our know-how in the development of fabric edge stops has led to the creation of numerous edge stops for well-known sewing machine makes
- Enormous stability and a long service life, even under demanding operating conditions
- For all machine makes and classes.
- Edge stops for fitting to the machine base plate
- Edge stops with pneumatic ventilation, swing-up action

MK MULTI-POSITION EDGE STOPS - FOR FLEXIBLE PRODUCTION NEEDS

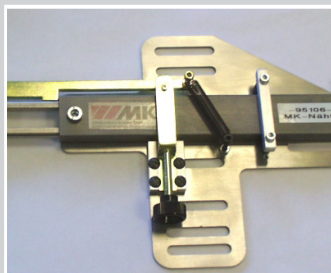

SPECIAL FEATURES:

- Several edge stops to the right of the needle or several to the left of the needle
- Edge stops can be used selectively to the right and left of the needle
- Pneumatic spring-action edge stops, retrieval of several distances is possible (e.g. 5, 8, 10 and 13 mm)
- Swing-up edge stop with four different distances that can be retrieved through a toggle switch
- Edge stops for fitting to the machine base plate

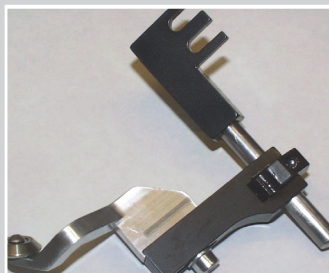

FABRIC EDGE STOPS

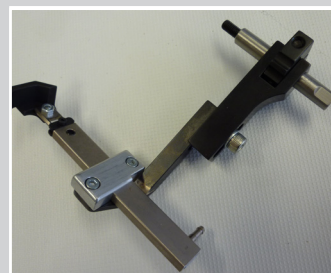

Pneumatic fabric edge stop to right of needle with cylinder for two edge distances and different stop heads

Fabric edge stop on base plate with several edge distances

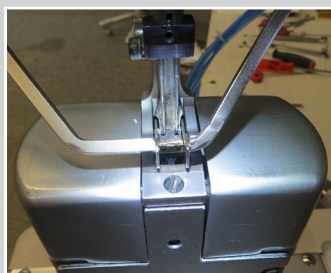

Swing-up fabric edge stop with inclined guide roller

Swing-up fabric edge stop to right of needle, with seam distances

Fabric edge stop to right of needle on a post-bed sewing machine

Swing-up fabric edge stop for right and left of needle

Two fabric edge stops swiveling up to right of needle

Pneumatic swing-up fabric edge stop to right of needle with cylinder for two edge distances.

Pneumatic swing-up multi-position edge stop up to four edge distances can be retrieved.
