

SEMI-AUTOMATIC SEWING SYSTEM FOR STRAIGHT DECORATIVE SEAMS  
ON SINGLE-LAYER PARTS

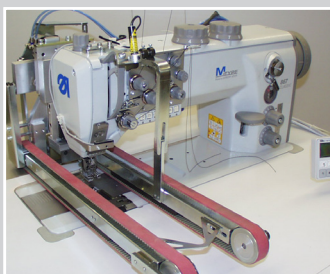

## ADDITIONAL TRANSPORT SMALL

Single-layer parts with a seam length of up to 600 mm are sewn on this two-belt sewing system. Maximum seam length 600 mm.

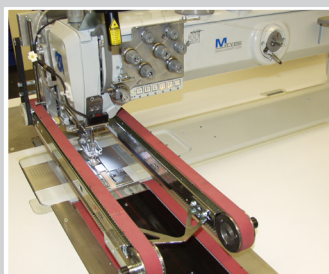

The material width is restricted by the sewing machine.

**SPECIAL FEATURES:**

- The marking notches are aligned along a laser line.
- Two flat belts transport the material absolutely straight and synchronous to the sewing machine speed.
- Drive provided by a step motor

Additional transport small on a double needle lockstitch machine

Additional transport small additional transport for straight seams mounted directly on the sewing machine
